When a man does not pay for his newspaper now, the paper can call him a thief, under the law, and prove it, and send him to jail just as though he had stolen any other valuable goods. A Neat Invention.

Mr. E. D. Dunn, of Tucson, has invented and applied for a patent upon a very ingenious and marvelously simple oscillating pump, that is designed, under certain conditions, to act automatically. There are two vertical pipes, with water valves over the lower end and near the top, just below the top valve there is a conical valve made with each pipe, outwardly, the pipe forming a segment of a circle, and downward, making it an enlarged cone. These valves are connected at their lowest point to a horizontal pipe. The pipes are partly lined with quicksilver, and when the pump is caused to move the quicksilver rises into the lowest bulb and creates a vacuum in the more elevated bulb, drawing up a quantity of water equal in weight to the quicksilver, which is held by the water valves.

It is understood that the invention will keep up a flow of water alternately from each pipe. The pump was originally designed for use on ship board to lift up brine water from the hold, and the natural working of the vessel, given an oscillating motion causes it to self-start.

Mr. Dunn, one of our Sulphur Spring Valley ranchers, came in to see the sights yesterday.

There is a general feeling in this city that District Attorney Savage should be relieved on account of his momentous services.
